

## **NEW : McGill Medical Simulation Centre Visit**

**Friday, May 18, 2007 – 13:30**

**Limited number of places are available, first-come-first-served rule. Please reserve your place by checking the registration form where indicated.**

With more than 16,000 sq. ft. of office, classroom and laboratory space, the McGill Medical Simulation Centre is the largest of its kind in Canada. It is fully integrated into McGill's professional programs and provides training facilities for the next generation of doctors, nurses, physiotherapists and occupational therapists. Established health care professionals are also able to take advantage of the Centre for professional upgrading that will be increasingly required by licensing bodies.
