

Practical Applications of Cold Gas-Dynamic Spray

Mr. David Wrigh

Accuwright Industries, USA

Accuwright Industries, Inc. is a leader in Research & Development and Production applications of LP Cold Spray. Applying soft materials such as Aluminum, Copper, Zinc and alloys of these materials, Accuwright has developed and pioneered repairs for Aluminum and Magnesium housings and worn components with Aerospace and Industrial applications. We propose to describe a brief history of our developments and specific application success to share practical potential in the Cold Spray process capabilities.
